

Using the } UP.Browser

getting started

Your phone's UP.Browser is your window to the Internet. Send and receive email, check traffic and weather, get the latest financial news, and access a world of information. Getting started is easy:

- 1 Register the phone with your wireless service carrier.
- 2 Use this guide to learn how the Browser works—how to navigate applications, enter text, and use other features.
- 3 See the applications handbook provided by your carrier to learn how to use email and other applications.

phone.com

navigating

START THE UP.BROWSER. Turn on your phone. Then choose Browser from the phone's main menu. The first time you connect, you're asked to enable security. Do this by pressing the left blank key (called a "softkey") under the word "Yes."

SCROLL TO READ MORE. Press the down or up key.

TELL THE BROWSER WHAT TO DO. Two softkey labels at the bottom of the screen are for choosing an option, opening a menu, or making some other choice. Press one using the blank key directly below the label. If a screen lists options, choose one by scrolling to position the ► next to the option. Then press the left softkey, often labeled OK.

GET BACK TO WHERE YOU WERE. Press the Back key to back up one screen at a time. To go directly to the Home menu, press Home.

EXIT THE BROWSER. To make a phone call, simply press the End key. You return to voice mode.

Directory

- 1 Info Search..
- 2 ► Financial..

Scroll to an option and press the OK softkey to choose it. Or just press the corresponding number key.

Opening the UP.Browser shows the Home menu where you start applications.

Use the up and down keys to position the ► next to an option

Softkey labels

Left softkey, currently labeled OK on the screen

Dial a selected phone number

Go to the Home menu

Up and down keys for scrolling

SCREEN ICONS

- You're connected
- New message in Inbox
- Scroll to see more
- Message in Outbox
- Phone call in progress
- Security enabled

Right softkey, currently labeled Inbox on the screen

Exit the Browser

Return to the previous screen

Delete email messages (Clear key)

entering text

To write email, enter a phone number, or type some other text, use the number keys. How they work depends on the text-entry mode. Press the right softkey to choose another mode.

LETTERS. In ALPHA mode, you use the 2 key to type a, b, and c; the 3 key to type d, e, and f; and so on. For instance, to type a, press the 2 key once, to type b, press 2 twice. To type consecutive letters on the same key, just wait for the | to move ahead. Type a capital letter by pressing the * key first.

For faster typing try SMART mode. When you press a key, the Browser guesses which letter you want.

NUMBERS. In ALPHA mode, keep pressing a key until the number appears. To type only numbers, use NUM mode.

SYMBOLS AND PUNCTUATION. Press the 0 or 1 key until you see the symbol you want. Or switch to SYM1 mode to see tables of characters you can type by pressing a number key. Press the MORE softkey to see more tables.

I'm running late.

Lunch |
OK alpha

The right softkey shows the current text-entry mode. Press it to choose another mode.

1 = . 2 = ! 3 = ?
4 = , 5 = - 6 = "
7 = " 8 = (9 =)

In SYM1 mode, press a number key to type the associated character.

TEXT-ENTRY MODES

ALPHA Letters and numbers

NUM Numbers only

SMART Browser guesses next letter

SYM1 Symbols and punctuation

Here's how your phone works when it's time to type, as when writing an email message.

Move the | left, right, up, or down to edit what you've typed

Cycle through punctuation.

Enter text using number keys. Press here twice to type "h"

Press once to type a capital letter, twice for Caps Lock

This symbol marks where your typing appears

Current text-entry mode

Cycle through other text-entry modes

Delete previous character; press and hold to delete all your typing

Cycle through special symbols

Type a space

browser menu

Bookmarks:

- 1 > Symbol MCD
- 2 SFO Weather

Bookmark sites you go to often, such as a stock quote page or weather service.

Channels:

- 1 > Email
- 2 Calendar

Applications that you can access offline appear under Channels.

The Browser menu has other useful features. Open it by pressing the Menu key.

BOOKMARK FAVORITE SITES. Go to the site. Then open the Browser menu and choose Mark Site. You can bookmark most screens, which can then be opened from the Home menu. To find out more, see the applications handbook provided by your carrier.

RESET THE BROWSER. If something isn't working right, try beginning a brand new session by choosing Advanced from the Browser menu. Then choose Reset.

WORK OFFLINE. Most applications are stored on a server that you can't access outside your wireless coverage area. But some applications can reside in your phone where you can use them offline. Start them by opening Channels from the Browser menu. For details, see your applications handbook.

CHANGE CARRIER SETTINGS. If your carrier tells you to point your phone at a new server or enter a new encryption key, use Set UP.link or Encryption under Advanced in the Browser menu.

The Browser menu provides features in addition to those available from the keypad.

Open the Home menu

Bookmark the screen you were on before opening the Browser menu

Open the Browser menu

Open online help

List applications available offline

If you enter information offline that needs to be delivered when you next connect, a message appears in the Outbox

Press and hold a number key at anytime to go to the corresponding bookmark; for example, press and hold 3 to go to Bookmark #3
